Introduction

This document presents a brief data profile for the South Western Sydney district. It contains a series of tables and graphs that show the characteristics of persons, families and communities. It includes demographic, housing, child development, community safety and child protection information.

Where possible, we present this information at the local government area (LGA) level.

In the South Western Sydney district, there are seven LGAS:

- Camden
- Campbelltown
- Canterbury-Bankstown¹
- Fairfield
- Liverpool
- Wingecarribee
- Wollondilly

The data presented in this document is from a number of different sources, including:

- Australian Bureau of Statistics (ABS)
- Bureau of Crime Statistics and Research (BOCSAR)
- NSW Health Stats
- Australian Early Developmental Census (AEDC)
- NSW Government administrative data.

¹ **Please note:** The Canterbury-Bankstown LGA also belongs to the Sydney district. The figures presented in this document are for the entire Canterbury-Bankstown LGA.

The majority of these sources are publicly available. We have provided source statements for each table and graph. This tells you where the data comes from and where you can find more information.

Please note, the information in the original sources may change as authors (e.g. ABS, NSW Healthstats) update the data. As such, we have also recorded the date we accessed the information.

If you would like additional suburb-level and Aboriginal and Torres Strait Islander specific data, the following sources are available to you:

- The ABS provides demographic, cultural and linguistic diversity, employment and housing data at a suburb level through Quick Stats: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20QuickStats>. For example, for the Liverpool suburb, select 'Liverpool, NSW: State Suburb (SSC)' from the drop down menu.
- The ABS also ranks suburbs on the Socio-Economic Indexes for Areas (SEIFA): http://stat.data.abs.gov.au/Index.aspx?DataSetCode=SEIFA_SSC. For more information on the SEIFA, see page 30.
- BOSCAR records criminal offences at a suburb level: https://www.bocsar.nsw.gov.au/Pages/bocsar_datasets/Datasets.aspx. Follow the 'Suburb' link in the Geographic breakdown category for a spreadsheet containing all suburb-level crime data.
- Information about Aboriginal and Torres Strait Islander persons, families and dwellings, including comparisons with non-Indigenous people, is also available at LGA level through the ABS 2016 Census Community Profiles: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20Census%20Community%20Profiles>. For example, for information about the Aboriginal and Torres Strait Islander population of Liverpool, select 'Liverpool (C), NSW: Local Government Area (LGA)' from the drop down menu, and follow the link for the 'Aboriginal and Torres Strait Islander Peoples Profile'.

Demographic Data

Population – South Western Sydney

The population in the South Western Sydney district was estimated at 1,081,070 in the 2016 Census. This district is made up of seven local government areas (LGAs). The largest LGA is Canterbury-Bankstown, with an estimated population of 346,302. The smallest LGA is Wingecarribee with an estimated population of 47,882 (see Figure 1).

Figure 1. Population of South Western Sydney District, by LGA

Source: ABS Quickstats, 2016 Census: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20QuickStats> (accessed 4 October 2019)

The median age in New South Wales is 38 years of age. In the South Western Sydney district, most LGAs were younger than the NSW average. Liverpool and Camden were the youngest with an average age of 33. Wingecarribee was the oldest, with an average age of 47.

Table 1 shows a breakdown of age for each LGA in the South Western Sydney district.

Aboriginal and Torres Strait Islander population

In the South Western Sydney district, 1.6% (n=17,462) of the population identify as Aboriginal and/or Torres Strait Islander (see Table 2). The majority of these people, 55.5%, were under 25 years old. This is higher than the NSW state average, where only 28.6% of the Aboriginal and/or Torres Strait Islander population are under 25 years old.

Country of birth

In the South Western Sydney district, 54.8% of residents were born in Australia (see Table 3). This is lower than the New South Wales state average of 65.5%. Fairfield, Canterbury-Bankstown and Liverpool had the largest proportion of overseas-born residents. Wollondilly, Wingecarribee and Camden had the smallest proportion of overseas-born residents.

The most common birthplaces in the South Western Sydney district, other than Australia, were Vietnam, Iraq, China, and Lebanon.

¹ Excludes SARs and Taiwan

Languages spoken at home

In the South Western Sydney district, 46.3% of residents spoke only English at home (see Table 4). This is much less than the New South Wales state average of 68.5%.

The proportion of households where a non-English language was spoken at home was highest in Fairfield (75.5%), Canterbury-Bankstown (63.7%), and Liverpool (57.2%), and was lowest in Wingecarribee (7.5%) and Wollondilly (8.9%).

Migration stream

Of the total number of migrants who arrived in NSW between 1 January and 31 December 2017, 19.2% (n=15,538) settled in the South Western Sydney district (see Table 5).

The largest number of migrants to the District settled in Canterbury-Bankstown (n=5,627). Most of these were skilled migrants (n=2,781) followed by family migrants (n=2,506) and then humanitarian migrants (n=340).

A total of 4,268 humanitarian migrants settled in the South Western Sydney district. The majority of these migrants settled in Fairfield.

Table 5. Migration Stream in South Western Sydney, by LGA, between 1 January and 31 December 2017

Children and Young People

Government schools

The following tables provide information about the government schools in the six LGAs that make up the South Western Sydney district. These tables provide information on the following factors:

No. of FTE enrolments	The number of full-time equivalent (FTE) enrolments indicates the number of students who attended the school over the course of the academic year. For example, 39.2 means 39 students were enrolled full time for one academic year and one student was enrolled for a fifth of the year.
% of ATSI	The percentage of FTE students enrolled who identify as Aboriginal and/or Torres Strait Islander.
% of LBOTE	The percentage of students (headcount) who have a language background other than English (LBOTE). A student has a LBOTE if they, or their parents or guardians, speak a language other than English at home.
ISCEA value	<p>The Index of Community Socio-Education Advantage (ICSEA) provides information about the socio-educational backgrounds of a school's students. This is worked out by looking at the parents' occupation and education, a school's geographical location, and the proportion of Indigenous students.</p> <p>The ICSEA is set at an average of 1000. The lower the ICSEA level, the lower the educational advantage of students who go to this school. The highest score of a public school in New South Wales is 1245, and the lowest score is 543.</p>
% School attendance	The attendance rate is the number of actual FTE student days attended by full-time students in Years 1-10 in Semester One as a percentage of the total number of possible student-days attended in semester one.

There are 175 government schools in the South West Sydney district (6a-6f):

- 18 in the Camden LGA
- 44 in the Campbelltown LGA
- 38 in the Fairfield LGA
- 43 in the Liverpool LGA
- 17 in the Wingecarribee LGA
- 15 in the Wollondilly LGA.

The smallest of these schools is Penrose Public School in the Wingecarribee LGA (11 FTE enrolments) and the largest is Westfield Sports High School in Fairfield (1654.8 FTE enrolments).

The government schools in South Western Sydney with the largest proportion of Aboriginal and Torres Strait Islander students are all in Campbelltown LGA: Briar Road Public School (37%), followed by Airs High School (23%) and Guise Public School (21%).

Schools with the highest proportion of LBOTE students are all in Fairfield: Canley Vale Public School (97%) followed by Cabramatta High School, Canley Vale High School and Old Guildford Public School (all 96%).

The government schools with the highest and lowest ISCEA values are in the Campbelltown LGA. The lowest is Briar Road Public School (823) followed by John Warby Public School (823). The highest is the selective high school – Hurlstone Agricultural High School (1123).

The school with the lowest school attendance is Airs High School in Campbelltown LGA (80.1%). The school with the highest is Governor Phillip King Public School in Fairfield LGA (96.2%).

Table 6a. Profile of government schools in the Camden LGA

Source: NSW Centre for Education Statistics and Evaluation, Master dataset: NSW government school locations and student enrolment numbers (2017) <https://data.cese.nsw.gov.au/data/dataset/nsw-public-schools-master-dataset> (accessed 7 October 2019), Student attendance rate by individual government schools (2011-2017): <https://data.cese.nsw.gov.au/data/dataset/student-attendance-rate-by-school> (accessed 7 October 2019).

The Department of Education also provides information about suspensions and expulsions from government schools at the district level².

Table 7 shows that the South Western Sydney district has a slightly higher proportion of students who received short suspensions (four days or less) in 2018 compared to the NSW state average. In 2018, 4.4% of students received short suspensions in South Western Sydney, compared to 4.0% in NSW.

The proportion of students who received long suspensions (4-20 school days) was similar to the NSW state average; 1.6% in the district compared to 1.5% in the state.

In the South Western Sydney district, 29 students were expelled for misbehaviour in 2018, which is 16.6% of the total expulsions for misbehaviour in the state. Another 61 students were expelled for unsatisfactory participation, which is 34.8% of the total 122 students expelled for this reason in New South Wales.

Table 7. Suspensions and expulsions from government schools in South Western Sydney district, 2018

	South Western Sydney	New South Wales
Total short suspensions ¹	7,905	52,755
Total number students short suspended	5,160	32,343
Students short suspended as % of enrolment	4.4%	4.0%
Total long suspensions	2,599	17,235
Total number students long suspended ²	1,869	12,355
Students long suspended as % of enrolment	1.6%	1.5%
Students expelled for misbehaviour	29	175
Students expelled for unsatisfactory participation	61	122

Source: NSW Centre for Education Statistics and Evaluation, Suspensions and Expulsions in NSW government schools (2015-2018): <https://data.cese.nsw.gov.au/data/dataset/suspensions-and-expulsions-in-nsw-government-schools> (accessed 9 October 2019)

¹ includes students on short suspension (four days or less) on more than one occasion

² includes students on long suspension (four to 20 school days) on more than one occasion

² To our knowledge, LGA data is unavailable.

Early childhood development

The Australian Early Development Census (AEDC) measures the early childhood development of children in Australia in their first year of full-time school. It measures this across five domains that predict later health, education and social outcomes:

- physical health and wellbeing
- social competence
- emotional maturity
- language and cognitive skills (school-based)
- communication skills and general knowledge

MORE INFORMATION

More information about the AEDC domains can be found in the [About the AEDC Domains](#) fact sheet.

The AEDC results can tell us if children are developmentally on track or if they need more support through their school years.

In the 2018 AEDC, the majority of children in the South Western Sydney district were developmentally on track (see Figures 2-8). In all seven LGAs, over 65% of children were developmentally on track for each of the five AEDC domains. The proportion of children developmentally 'at risk' and 'vulnerable' was greatest in the Fairfield LGA.

Figure 8. 2018 AEDC results for Wollondilly LGA

Source: AEDC Data Explorer: <https://www.aedc.gov.au/data/data-explorer> (accessed 7 October 2019)

The AEDC also has two summary indicators that measure developmental vulnerability across all five domains.

In 2018, 10.8% of children were developmentally vulnerable on two or more domains in the South Western Sydney district (see Table 7). This is slightly higher than the NSW average of 9.6%.

Fairfield and Campbelltown had the highest proportion of children developmentally vulnerable on two or more domains, at 15.1% and 13.6% respectively.

Camden and Wollondilly had the smallest proportion of children developmentally vulnerable on two or more domains, at 6.8% and 5.2%.

Table 7. Percentage of children developmentally vulnerable in South Western Sydney District, by LGA, 2018

	Developmentally vulnerable on 1 or more domain		Developmentally vulnerable on two or more domains		Total no. of children measured
	No.	%	No.	%	
Camden	202	15.0	91	6.8	1,430

Vulnerable children and young people

Using the Their Futures Matter (TFM) Human Services Dataset, TFM identified three vulnerable groups of children and young people in NSW:

Young children aged 0-5	Children aged 5 or younger at 30 June 2017 with one or more of the following: <ul style="list-style-type: none">• 1 or more parental risk factors• 2 or more perinatal risk factors• Assessment as at ROSH
Children aged under 15 and affected by mental illness	Children under 15 years at 30 June 2017 with one or more the following: <ul style="list-style-type: none">• Use of NSW mental health services (hospital or ambulatory)• Parental use of NSW mental health services (hospital or ambulatory)
Children and young people aged 15-18 and affected by mental illness	Children and young people between 15-18 years at 30 June 2017 with one or more of the following: <ul style="list-style-type: none">• Use of NSW mental health services (hospital or ambulatory)• Parental use of NSW mental health services (hospital or ambulatory)

For each vulnerable group, TFM identified five indicators associated with poor outcomes later in life. They also identified the proportion of this group with this indicator. TFM identified these indicators by undertaking predictive modelling and analysis, using the TFM Human Services Data set. This dataset brings together data collected by ten different government agencies. It includes data on child protection, housing, justice, health, education, and commonwealth service use.

Table 9 shows the top five indicators for each vulnerable group in the South Western Sydney district.

Table 9. Indicators of vulnerable children and young people in the South Western Sydney district

Vulnerable group	Indicator	% of group with indicator
Young children aged 0-5	Parents have interacted with justice system	30
	Mother smoked during pregnancy	22
	Child had concern report	23
	Mother aged 21 and under at childbirth	13
	Parents have been in social housing	10
Children aged under 15 and affected by mental illness	Child had a concern report	36
	Mother smoked during pregnancy	23
	Parents have interacted with justice system	26
	Mother aged 21 and under at childbirth	15
	Parents have been in social housing	17
Children and young people aged 15-18 and affected by mental illness	NAPLAN Year 7 band less than 6	48
	Had concern report in the last three years	31
	Hospital admission in the last three years	32
	Family have been in social housing	26
	Has appeared in court	5

Source: Their Futures Matter, FACS District Data pack, South Western Sydney district

Table 10 shows the number and proportion of children in each of the vulnerable groups by LGA. It also shows us what proportion of this group identifies as Aboriginal.

For example, in Campbelltown, 13,351 children were under the age of five. Of these children, 36% (n=4,807) were identified as vulnerable and 17% of these vulnerable children identified as Aboriginal. By comparison, in Camden, 24% of children under the age of five were vulnerable and 9% of these vulnerable children identified as Aboriginal.

When looking at children under the age of 15, 13% were affected by mental illness in Wingecarribee compared to 8% in Fairfield and 9% in Canterbury-Bankstown.

When looking at children and young people between the ages of 15 and 18, 17% were affected by mental illness in Campbelltown, compared to only 9% in Fairfield.

Table 10. Vulnerable groups of children and young people in the South Western Sydney district, by LGA

Contact with child protection services

In 2016-17, 0.9% (n=2,362) of children and young people aged 18 and under were in out-of-home care (OOHC) in the South Western Sydney district (see Table 11). Campbelltown had the largest number of children in OOHC, at 744.

In 2016-17, 4.7% (n=11,887) of children and young people aged 18 and under were found to be at risk of significant harm (ROSH). Campbelltown (n=2,965), Canterbury-Bankstown (n=2,846) and Liverpool (n=2,505) had the largest number of children at ROSH.

Wingecarribee had the smallest number of children reported at ROSH or in OOHC.

Table 11. Child Protection Overview in the South Western Sydney District, by LGA, 2016-17

Economic Environment

Education

In the South Western Sydney district, 21.6% of people aged 15 and over reported completing Year 12 as their highest level of educational attainment. This was followed by 17.8% who reported having a Bachelor degree level and above as their highest level of educational attainment (see Table 12).

Table 12. Level of highest educational attainment in South Western Sydney district, by LGA (people aged 15 years and over)

Employment

There were 484,564 people who reported being in the labour force in the week before Census night in the South Western Sydney district. Of these, 59.2% were employed full time, 28.1% were employed part-time and 7.6% were unemployed (see Table 13).

The proportion of people who were unemployed was highest in Fairfield (10.5%) and lowest in Wingecarribee (3.8%).

Table 13. Employment in South Western Sydney district, by LGA

Socio-economic advantage and disadvantage

The Socio-Economic Indexes for Areas (SEIFA) is a measure used to rank areas in Australia according to socio-economic advantage and disadvantage. It is based on information from the five-yearly Census of Population and Housing.

The information presented below is based on the Index of Relative Socio-economic Advantage and Disadvantage (IRSAD). The IRSAD summarises information about the economic and social conditions of people and households within an area.

In the South Western Sydney district, out of the seven LGAs, Camden has the highest SEIFA score (1,056) and is ranked the highest (see Table 16). This means Camden is relatively advantaged compared to the other LGAs in the South Western Sydney district.

Conversely, out of the seven LGAs, Fairfield has the lowest SEIFA score (896) and is ranked the lowest (see Table 16). This means Fairfield is relatively disadvantaged compared to the other LGAs in the South Western Sydney district.

Table 16. LGA Index of Relative Socio-economic Advantage and Disadvantage in South Western Sydney district, 2016

	Score ¹	NSW Rank ²	NSW Decile ³
Camden	1056	109	9
Campbelltown	948	55	5
Canterbury-Bankstown	961	72	6
Fairfield	896	8	1
Liverpool	972	82	7
Wingecarribee	1022	100	8
Wollondilly	1030	104	8

Source: ABS, Socio-Economic Indexes for Areas (SEIFA), 2016, 2033.0.55.001, accessed 7 October 2019, <https://www.abs.gov.au/AUSSTATS/abs@.nsf/DetailsPage/2033.0.55.0012016?OpenDocument>

¹ **Score:** A low IRSAD score indicates that an area is relatively disadvantaged compared to an area with a higher score.

² **Rank:** All areas are ranked from the lowest to the highest score. The area with the lowest score is ranked number one, the area with the highest score is ranked 129. The State Rank can only be used to compare areas with a single state/territory.

³ **Decile:** All areas are ordered from the lowest to highest score, the lowest 10% of areas are given a decile number of 1 and so on, up to the highest 10% of areas which are given a number of 10. This means that areas are divided into 10 groups, depending on their score. Decile 1 is the most disadvantaged relative to other deciles.

Social Environment

Community safety and crime

In the South Western Sydney district, 4,293 domestic violence-related assaults and 3,249 non-domestic violence-related occurred between January and December 2018.

Domestic violence-related assault was most likely to occur in Campbelltown, with a rate of 565.3 per 100,000 people (see Table 17).

Table 17. Incidents of crime recorded by the NSW Police Force in the South Western Sydney NSW district, by LGA, January-December 2018

	Domestic violence-related assault			Non-domestic violence-related assault		
	No.	Rate per 100,000 population	Rank in NSW ¹	No.	Rate per 100,000 population	Rank in NSW

Maternal Health

Teenage pregnancy

Teenage parenthood is associated with a number of adversities, including low socioeconomic status, educational under-achievement and drug abuse. In turn, young parenthood can act to further entrench some of these problems and perpetuate a cycle of disadvantage.

In 2018, 281 mothers aged 19 and under gave birth in the South Western Sydney district (see Table 19). This accounts for 1.7% of all births in this district. This proportion is very similar to the NSW state average of 1.9%. Campbelltown had the highest proportion of young mothers aged 19 and under, 3.2%, in 2018

Table 19. Young mothers who gave birth¹ in South Western Sydney district, by LGA, 2018

LGA	No. of mothers 19 and under	% of mothers giving birth aged 19 and under	Total no. of births
Camden	14	0.8	1,909
Campbelltown	81	3.2	2,455
Canterbury-Bankstown	58	1.2	4,943
Fairfield	47	2.0	2,323
Liverpool	52	1.6	3,340

¹ Number of mothers who gave birth (stillbirth or live birth) in NSW, regardless of place of permanent residence

Smoking during pregnancy

Smoking during pregnancy is an important modifiable risk factor for low birth weight, pre-term birth, placental complications, and perinatal mortality.

Between 2015-2017, mothers in Campbelltown were most likely to smoke during their pregnancy, at 13.0% (see Figure 10). This was followed by Wingecarribee at 10.5%. Mothers in Camden were least likely to smoke during their pregnancy, at 4.9%.

Figure 10. Proportion of mothers in the South Western Sydney district who smoked during pregnancy, 2015-2017

Australian Mothers Index

Since 2000, Save the Children has produced a Mother's Index showing where mothers do best and where they face the greatest hardships. This index compares countries worldwide, as well as Australian states and territories and LGAs.

The information in Table 20 is derived from the Local-level Mothers Index. Five indicators make up this index:

- maternal health - the proportion of pregnant women with at least one antenatal visit in the first trimester
- children's wellbeing - the proportion of children under 5 developmentally on track (measured by the AEDC)
- educational status - the proportion of women completing Year 12 or above
- economic status - average household income
- relative socioeconomic disadvantage - a measure of a mother's access to material and social resources and her ability to participate in society.

These indicators were used to rank every LGA in NSW, where 1 is the best rank and 152 is the worst.

Camden performed the best in the South Western Sydney district, receiving a rank of 26 out of 152 (see Table 20). Fairfield received the lowest rank of the seven LGAs, at 117 out of 152. This means that mothers in Fairfield are facing much greater hardships than mothers in Camden.

Table 20. Mothers Index Ranking in the South Western Sydney District, by LGA

LGA	NSW Ranking
Camden	26
Campbelltown	80
Bankstown ¹	98
Fairfield	117
Liverpool	66

¹ This data is based on the old Bankstown LGA boundaries, rather than the updated Canterbury-Bankstown boundaries.

Disability

Need for assistance with core activities

In the South Western Sydney district, 6.7% of the population need help or assistance with core activities (see Table 21). This amounts to 67,167 people.

In the Fairfield LGA, 8.5% of people need help or assistance with core activities. This was the highest proportion of all seven LGAs. In the Wollondilly LGA, 4.6% of people need help or assistance with core activities. This was the smallest proportion of all seven LGAs.

Table 21. Need for assistance with core activities¹ in South Western Sydney district, by LGA

	Has need for assistance		Does not have need for assistance		Need for assistance not stated		Total
	No.	%	No.	%	No.	%

¹ A person's need for help or assistance in one or more of the three core activity areas of self-care, mobility, and communication, because of a disability, long-term health condition (lasting six months or more) or old age.

Households and Social Housing

Households

In the South Western Sydney district, the average number of people per households was 3. Fairfield and Liverpool had the highest average, 3.3 and 3.2 respectively (see Table 22)

The majority of households in the South Western Sydney district are family households (79.8%). Single-person households make up 17.8% of all households. Only 2.4% of households in the district are group households.

Table 22. Household Composition in South Western Sydney, by LGA

LGA	Single-person households		Group households		Family households		Total	Average people per household
	No.	%	No.	%	No.	%		No.

Tenure types

In the South Western Sydney district, 28.5% of occupied private dwellings were owned outright, 35.2% were owned with a mortgage and 31.5% were rented (see Table 23).

Wingecarribee has the highest proportion of homes owned outright, at 43.5%. Liverpool has the lowest of homes owned outright, at 24.1%.

Canterbury-Bankstown had the highest proportion of rented private dwellings, at 36.4%.

Table 23. Tenure of occupied private dwelling in the South Western Sydney, by LGA

LGA	Owned outright		Owned with mortgage		Rented		Other tenure		Not stated	
	No.	%	No.	%	No.	%	No.	%	No.	%

Housing affordability

One way to measure housing stress is to calculate the percentage of households who spend more than 30% of their household income on rent or mortgage payments. In the South Western Sydney district, Fairfield has the highest proportion of households in rental stress (18.9%), followed by Canterbury-Bankstown (18.1%) and Liverpool (14.5%). These three LGAs are all above the state average of 12.9% (see Table 24).

Liverpool and Camden had the highest proportions of households in mortgage stress, at 12.2% and 21.1% respectively. Wingecarribee had the lowest proportion of households in mortgage stress.

Table 24. Mortgage and rent payments in the South Western Sydney district, by LGA¹

	Camden	Campbelltown	Canterbury-Bankstown	Fairfield	Liverpool	Wingecarribee	Wollondilly	NSW
Average weekly rent	\$460	\$350	\$380	\$350	\$370	\$350	\$365	\$380
Renting households where rent payments are less than 30% of household income	92.5%	87.2%	81.9%	81.9%	85.5%	91.8%	94.0%	87.1%
Renting households where rent payments are less than 30% of household income	7.5%	12.8%	18.1%	18.9%	14.5%	8.2%	6.0%	12.9%
Average monthly mortgage repayments	\$2,220	\$1,842	\$2,000	\$1,800	\$2,123	\$1,842	\$2,167	\$1,986
Home-owning households where mortgage repayments are less than 30% of household income	87.9%	89.6%	90.3%	90.5%	87.8	92.9%	88.8%	92.6%
Home-owning households with mortgage repayments greater than or equal to 30% of household income	12.1%	10.4%	9.7%	9.5%	12.2%	7.1%	11.2%	7.4%

¹ The number of households where rent and mortgage payments were 30% or more of an imputed income measure are expressed in this table as a proportion of the total number of households in an area. The nature of the income imputation means that the reported proportion may significantly overstate the true proportion.

Social housing

As of 30 June 2018, there were 24,424 social housing residential dwellings in the South Western Sydney district (see Table 25). Public housing accounted for 76.8% of these dwellings and community housing accounted for 21.0%. The majority of these dwellings were in Campbelltown.

Table 25. Social Housing Residential Dwellings in South Western Sydney, as at 30 June 2018

	Public Housing		Aboriginal Housing Office		Community Housing		Indigenous Community Housing		Total
	No.	%	No.	%	No.	%	No.	%	
Camden	388	92.6	6	1.4	23	5.5	2	0.5	419
