

COVID-19

Personal Protective Equipment (PPE)

Quick Reference Guide

This Quick Reference Guide is designed to provide a list of links to resources where information on requirements and the use of PPE, can be found. The links have been identified from a range of government and non-government web sites and include information sourced from health experts.

Resource link	What you'll find
NSW Government - PPE supplies portal for industry and the community	List of PPE suppliers. DCJ funded service providers can also contact their DCJ Contract Manager for assistance, if needed.
Clinical Excellence Commission - COVID-19 Infection Prevention and Control Manual	From Page 31 - Implementation of transmission-based precautions, including those relating to contact, droplet and airborne
	Page 55 - PPE for patients and health workers (aged care facility) dependent on risk of transmission (low, moderate, high transmission)
	Page 121 - COVID-19 risk assessment guide for PPE selection for direct care of patients
	Page 123 - Provides a visual guide to the application of PPE
	Page 129 - Provides a decision algorithm for recommended PPE use in allied health procedures
Clinical Excellence Commission - Education, training, posters and videos	Guidance, training and resources for using personal protective equipment (PPE) in response to COVID-19 in NSW

COVID-19

Personal Protective Equipment (PPE)

Quick Reference Guide

Resource link	What you'll find
