## Business Rules: Eligibility criteria for PSP Service Packages

---

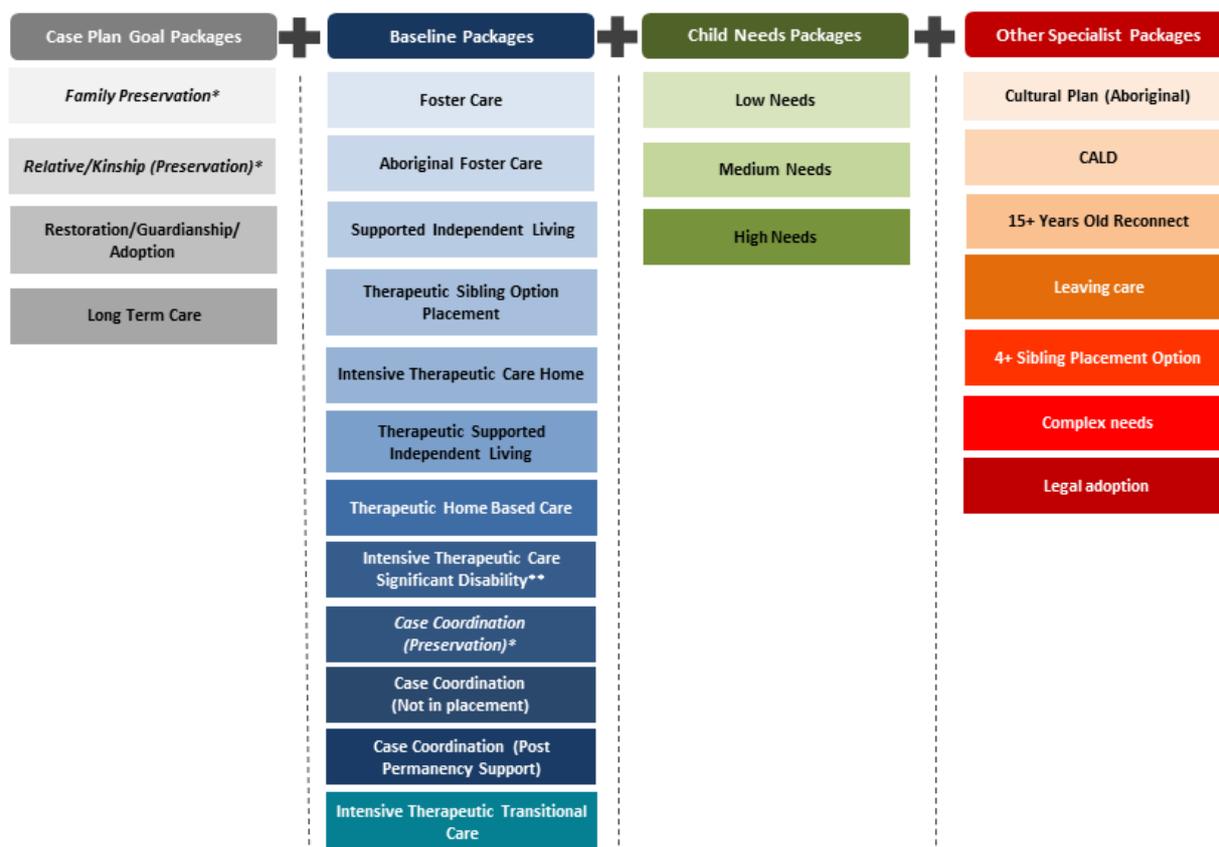

# 1 Packaged Care Service Model

## 1.1 Overview

The Permanency Support Program (PSP) packaged care service model is composed of a **case plan goal package**, **baseline package** and **child needs package**. **Specialist packages** are also available depending on the child or young person's<sup>1</sup> circumstances and eligibility. In extraordinary circumstances, an additional specialist package of **complex needs** may also be added.

The service design can be thought of as a 'build-up' approach whereby flexible options can be selected to meet the needs of children, young people and their families, and achieve the overall case plan goal.

From 1 July 2018, full service delivery commenced and the below packaged care service model applies.

## 1.2 Case management to funded service providers

Under PSP, children and young people are placed with a non-government service provider who has case management responsibility. The service provider receives funding via the PSP packages to cover the cost of providing case management as well as services and supports to address the needs of children and young people in their care.

<sup>1</sup> Throughout this document 'child and young person' is shortened to 'child'; 'children and young people' is shortened to 'children'.

\* Business rules for Preservation will be incorporated into this document in future. In the interim, please refer to the [PSP Family Preservation Packages Business Rules](#) and [PSP Family Preservation Package Program Framework](#).

\*\* The Intensive Therapeutic Care Significant Disability Package commences on 1 July 2019.

---

## 1.3 Approval of service packages

Approval processes may differ across FACS districts. The delegation for approval is FACS Manager Casework or above unless otherwise stated in the eligibility and business rules below. As set out in the [Permanency Case Management Policy](#), PSP service packages are to be negotiated in line with district structures including Commissioning and Planning.

## 1.4 Implementation of the PSP and relationship to other FACS funded programs

### 1.4.1 Background

The implementation of PSP packages is occurring alongside other FACS funded programs. This includes Intensive Family Preservation (IFP), Intensive Family Based Service (IFBS), NEWPIN, Multi-Systemic Therapy – Child Abuse and Neglect (MST-CAN®) and Functional Family Therapy – Child Welfare (FFT-CW®).

### 1.4.2 Referring families for restoration

Other FACS funded restoration programs must be fully utilised (where it is in the best interests of the child and meets the family's needs) prior to accessing PSP packages. However, in some circumstances, a funded program may not be suitable due to the family's cultural needs, a child's disability, or level of intensity required to support the child's case plan goal.

In some instances, FACS may determine that it is appropriate, and in the best interests of the child and their family, to refer them to both a funded restoration program (such as NEWPIN) and refer them to a PSP service provider for a restoration case plan goal package. This may be necessary because some funded programs do not provide case management or specific services to promote placement stability.

# 2 Case plan goal packages

## 2.1 Overview

A service provider will receive a case plan goal package (alongside a baseline and child needs package) based on the child's approved case plan goal in ChildStory. Case plan goal packages are mutually exclusive (each child can only have one case plan goal package at a time) and must be approved by FACS.

As the case plan goal package is paid together with a baseline and child needs package, the child must be eligible to receive all three packages for the service packages to apply.

Service providers are no longer eligible to receive this service package if:

- the child's case plan goal has been achieved<sup>2</sup>
- a child exits statutory OOH
- FACS and the service provider agree services are to cease due to other reasons (ie. when the child's case plan goal is changed).

Service providers cannot receive a case plan goal package (for restoration, guardianship or adoption) beyond two years unless it has been reviewed and approved for extension. This approval is delegated to an Executive District Director.

---

<sup>2</sup> Please refer to the [Permanency Case Management Policy](#) for additional information.

## 2.2 Minimum review periods

Minimum review periods have been established for each case plan goal package. These reviews will allow service providers<sup>3</sup> and FACS to jointly consider the progress made towards the child's case plan goal, and determine whether it is still appropriate or if there is an alternate permanency goal that would best meet the needs of the child.

## 2.3 Changing and approving the case plan goal package

While case management sits with the service provider, the decision to change a child's case plan goal is made by FACS as:

- the commissioner of the permanency support service (whether or not the child or young person is in OOHC) and
- the agency with statutory responsibility for exercising parental responsibility for children in OOHC.

The case plan goal package is triggered by the approved case plan goal in the child's OOHC case plan in ChildStory.

The only way to change the case plan goal package is to update, and for FACS to approve, a change to the child's case plan goal. Service providers can make a service request to change the case plan goal through the ChildStory Partner Community. Refer to the Quick Reference Guide in ChildStory for more information.

Where a child does not have a case plan goal recorded the default package is restoration. For children in long term care it is important that prior to any placement change the case plan goal is accurately recorded so it does not automatically default to the restoration package.

The below table outlines which case plan goals in ChildStory are associated with each case plan goal package.

OOHC Case Plan Goal in ChildStory	Corresponding case plan goal package triggered in ChildStory
Determine permanent care	Restoration
Restoration	Restoration
Guardianship	Guardianship
Adoption	Adoption
Permanent Care	Long Term Care
Leaving Care	Long Term Care
<b>Case Plan Goal missing or incomplete</b>	Default package - restoration

<sup>7</sup> *Away from Placement* is a temporary period when a child leaves an authorised placement and the authorised placement remains open until they return.

## 4 Child Needs packages

### 4.1 Overview

A service provider will receive a child needs package for a child in statutory OOHC based on the outcome of the Child Assessment Tool (CAT).

For new children entering OOHC, FACS Child and Family District Units (CFDUs) will apply the Child Assessment Tool (CAT) as per the [Child Assessment Tool User Manual](#) to determine the level of child needs package required. Information from the [Client Information Form](#) and from the referring Community Services Centre (CSC), service provider and the authorised carer (as relevant) will be used in applying the CAT.

While the services provided across low, medium and high child needs packages will largely be the same, they will differ in the intensity required to support the child's need level. For children with a disability it is expected that support will be provided through a comprehensive National Disability Insurance Scheme (NDIS) plan.

### 4.2 Changing and approving the child needs package

The outcome of the CAT assessment in ChildStory will determine which child needs package a child or young person will receive. The CAT assessment will reflect the outcome as either low, medium or high needs.

Where a CAT assessment is not completed, the default child needs package is low.

The only way to change a child needs package is for FACS to complete and approve a new CAT assessment. If the CAT outcome does not reflect the child or young person's needs, an over-ride can be approved by a FACS Manager Casework and completed in ChildStory.
